VIDEOS ORAL HEALTH, ACCORDING TO KIDS -

Kids say the darnedest things! What did you think about oral health when you were five years old? Chances are you didn't think about it at all, unless you had a painful cavity. See what these kids think about brushing their teeth, what keeps teeth strong, and going to the dentist!

www.ilikemyteeth.org/learn-and-share/oral-health-according-to-kids/

BRUSH 2MIN2X

Help your kids brush their teeth 2min2x (2 minutes each time, twice a day) for healthier teeth, good breath, fewer cavities, and to avoid painful dental problems. The Partnership for Healthy Mouths, Healthy Lives recommends that you help or watch over your kids' brushing until they're 8. Once your child's teeth start to come into the mouth, brush using a children's toothbrush and fluoride toothpaste in an amount no more than the size of a grain of rice.

WV CAVITY FREE BY 3 - FLUORIDE VARNISH AND MEDICAL PROVIDERS

Because primary care providers encounter new parents and infants during their well -child care visits, they are uniquely positioned to play a significant role in the prevention of dental caries. It is essential that primary care providers be aware of the infectious pathophysiology and associated risk factors of dental caries in very young patients so they make appropriate decisions regarding timely and effective intervention.

THE WEST VIRGINIA CAVITY FREE BY THREE: FLUORIDE VARNISH TRAINING PROGRAM

All primary care providers and staff that treat children are required to complete the Smiles for Life training course in caries risk assessment. The program targets children ages six months to under 36 months (three years) who are at-risk or high-risk for developing dental caries.

AMERICAN ACADEMY OF PEDIATRIC DENTISTRY (AAPD)

The national membership association representing the specialty of pediatric dentistry. AAPD equips parents and caregivers with the latest evidence-based information on the prevention of tooth decay and the establishment of a foundation for a lifetime of oral health. Includes reports and latest information. As the recognized authority on pediatric oral health care, it's important to us that parents and caregivers have a resource they can turn to whether they are looking for general information related to their child's dental health or guidance on a specific issue.

WHAT PARENTS SHOULD KNOW ABOUT DENTAL COVERAGE FOR THEIR CHILDREN UNDER THE ACA AND OTHER SOURCES

A child with good dental health has an easier time eating, speaking, sleeping, playing, going to school and paying attention in class. Unfortunately, tooth decay is the most common chronic early childhood disease in the United States, and dental problems cause America's children to miss 51 million school hours a year. Part of the solution to protecting the dental health of your children is a solid dental insurance plan that is the right fit for your family.

www.mychildrensteeth.org/education/aca_coverage_for_children/
