VIDEOS

ORAL HEALTH, ACCORDING TO KIDS

Kids say the darnedest things! What did you think about oral health when you were five years old? Chances are you didn't think about it at all, unless you had a painful cavity. See what these kids think about brushing their teeth, what keeps teeth strong, and going to the dentist!

www.ilikemyteeth.org/learn-and-share/oral-health-according-to-kids/

BRUSH 2MIN2X

Help your kids brush their teeth 2min2x (2 minutes each time, twice a day) for healthier teeth, good breath, fewer cavities, and to avoid painful dental problems. The Partnership for Healthy Mouths, Healthy Lives recommends that you help or watch over your kids' brushing until they're 8. Once your child's teeth start to come into the mouth, brush using a children's toothbrush and fluoride toothpaste in an amount no more than the size of a grain of rice.

MEDICAL: FLUORIDE VARNISH PROGRAM - CAVITY FREE BY THREE

Because primary care providers encounter new parents and infants during their well-child care visits, they are uniquely positioned to play a significant role in the prevention of dental caries. It is essential that primary care providers be aware of the infectious pathophysiology and associated risk factors of dental caries in very young patients so they make appropriate decisions regarding timely and effective intervention.

All primary care providers and staff that treat children are required to complete the Smiles for Life training course in caries risk assessment. The program targets children ages six months to under 36 months (three years) who are at-risk or high-risk for developing dental caries.

AMERICAN ACADEMY OF PEDIATRIC DENTISTRY (AAPD)

The national membership association representing the specialty of pediatric dentistry. AAPD equips parents and caregivers with the latest evidence-based information on the prevention of tooth decay and the establishment of a foundation for a lifetime of oral health. Includes reports and latest information. As the recognized authority on pediatric oral health care, it's important to us that parents and caregivers have a resource they can turn to whether they are looking for general information related to their child's dental health or guidance on a specific issue. **www.mychildrensteeth.org**

This infographic includes key stats from AAPD's first-ever State of Little Teeth Report which examines the epidemic of tooth decay among children.

WHAT PARENTS SHOULD KNOW ABOUT DENTAL COVERAGE FOR THEIR CHILDREN UNDER THE ACA AND OTHER SOURCES

A child with good dental health has an easier time eating, speaking, sleeping, playing, going to school and paying attention in class. Unfortunately, tooth decay is the most common chronic early childhood disease in the United States, and dental problems cause America's children to miss 51 million school hours a year. Part of the solution to protecting the dental health of your children is a solid dental insurance plan that is the right fit for your family.

www.mychildrensteeth.org/education/aca_coverage_for_children/

NEEDY MEDS: FREE AND LOW-COST CLINICS

Free and low-cost clinics provide primary and preventive medical and dental care to area residents. In addition to the clinic name, address, telephone number, website (if available) and location map, the following information is listed for each clinic: fees, insurance guidelines, eligible patient income levels, and services offered. Please note that clinics are not necessarily free.

<http://www.needymeds.org/free-clinics-branch>

ORAL HEALTH ADULT SERVICES PROGRAMS: DONATED DENTURE AND PRE-EMPLOYMENT PROJECTS

A project of the Bureau for Public Health, Office of Maternal, Child and Family Health/Oral Health Program (OMCFH/OHP) that offers free partials or full dentures through a partnership with dentists across the state who agree to donate their services to patients who meet various criteria. For more information on the Donated Denture Project or Pre-Employment Project, please visit your local DHHR office. Contact Charlene Hickman, Adult Services Supervisor, at 800-642 8522, 800-558 5388 or **charlene.m.hickman@wv.gov**.

FIND A HEALTH CENTER Health Resources & Services Administration (HRSA) Health Centers care for you, even if you have no health insurance – you pay what you can afford based on your income. Contact the health center organization directly to confirm the availability of specific services and to make an appointment. Search the database on the website to find a center near you.
